

Practice Facilities

The Practice:

Modern Surgeries & Equipment

Our surgeries have all been refurbished to be bright, open plan and patient friendly, whilst not detracting from the buildings prestigious heritage. Children will not be left alone as all the surgeries have parent seats beside each orthodontic chair.

We take cleanliness very seriously. The surgery uses state-of-the-art sterilisation.

X-ray facilities

Cephalogram - shows how your upper and lower jaws relate to the base of your skull and to each other. It also shows the angulation of your front teeth to their respective jaws.

OPT - may be taken at your first appointment to show which of your teeth are present and check for any hidden pathology.
