Why Choose Belmont Orthodontic Centre?

This is a once in a lifetime opportunity to have your smile corrected. You therefore want the **ORTHODONTIC TREATMENT** undertaken by an expert.

Belmont Orthodontic Centre is the orthodontic practice where every patient receives their treatment from a qualified Orthodontist.

The orthodontist is supported by friendly dental nurses, with more than 30 years of orthodontic experience between them.

As a result, our services are very popular and the majority of dentists in Shropshire refer their patients to us. This has resulted in waiting times for orthodontic treatment of approximately 18 months on the NHS and 2 - 4 weeks for private patients. However most people agree that the exclusive service provided is worth the wait!

What is Orthodontics?

Orthodontics is not only the straightening of teeth with 'braces', It also encompasses:

- Widening the smile for greater impact/effect.
- Uprighting and repositioning teeth to correct bite problems.
- Correcting the position of the jaws.
- Closing spaces which sometimes appear as teeth drift in middle age.
- Opening up space for an implant or bridge.
- Minor cosmetic movements e.g. straightening and correcting the heights of the upper front teeth, possibly prior to bleaching.
