

For Referring Dentists

The information of most use on referral is:

- History of dental trauma/marked dental pathology. In particular if you view a tooth as being of poor long term prognosis.
- The Patient's complaint.
- Relevant Medical History.
- An accurate contact address and telephone number.

The PCT will shortly circulate a proforma referral form for the use in all orthodontic referrals within Shropshire. There should still be the opportunity to provide the above information on this form.
